

## Our NEW Contatore Series II 10T Tyre Handler

In one of our most exciting design concepts to date, our new design Series II 10T Tyre Handler has been planned after not only listening to feedback from our valued customers but also identifying new safety functions and features that are currently not available on the market.

Our Series II 10T Tyre Handler centers on a light weight design to help reduce the size of the machine, focus on ease of operation, but most importantly an emphasis on the highest possible safety standard.

Featuring a modern design with quality robust construction, our Series II 10T Tyre Handler includes tyre arrestor arm for added safety, hydraulic tyre handler functions with electric joystick controls. Safety switch activation required in conjunction with joystick control to release clamped tyre avoiding accidental release of the tyre

- **Rated at Working Load Limit (WLL) of 10 tonne capacity.**
- **Hydraulic tyre arrestor arm.**
- **Hydraulic functions with joystick controls and LED panel.**
