

Tyre Handler Series 3 - 4 Tonne

Delivering
Engineering
Excellence

Features

- 1) **Mounting Bracket** design to suit various machines and quick hitches
- 2) **The Series-3 Main Body** can rotate 30° clockwise and counter-clockwise
- 3) **Inspection Protection Covers** allowing easy access for maintenance
- 4) **Clamping Arms** have a maximum extension of 4500mm and a minimum retraction of 1000mm
- 5) **Over Pressure Sensor** with visual and audible alarm, in case of tyre being inflated in between the arms
- 6) **Clamp Pads** with replaceable outer poly ring for rim holding capabilities

7) **Hydraulically Driven Tyre Arrestor Arm** in the event of accidental tyre slip

8) **Side Shift** allowing 200mm lateral movement whilst in clamp mode for easy manipulation of tyre

9) **Hydraulic Circuits** incorporate load holding valves and pressure sensors for overload warnings

10) **Camera** for efficient and safe operation

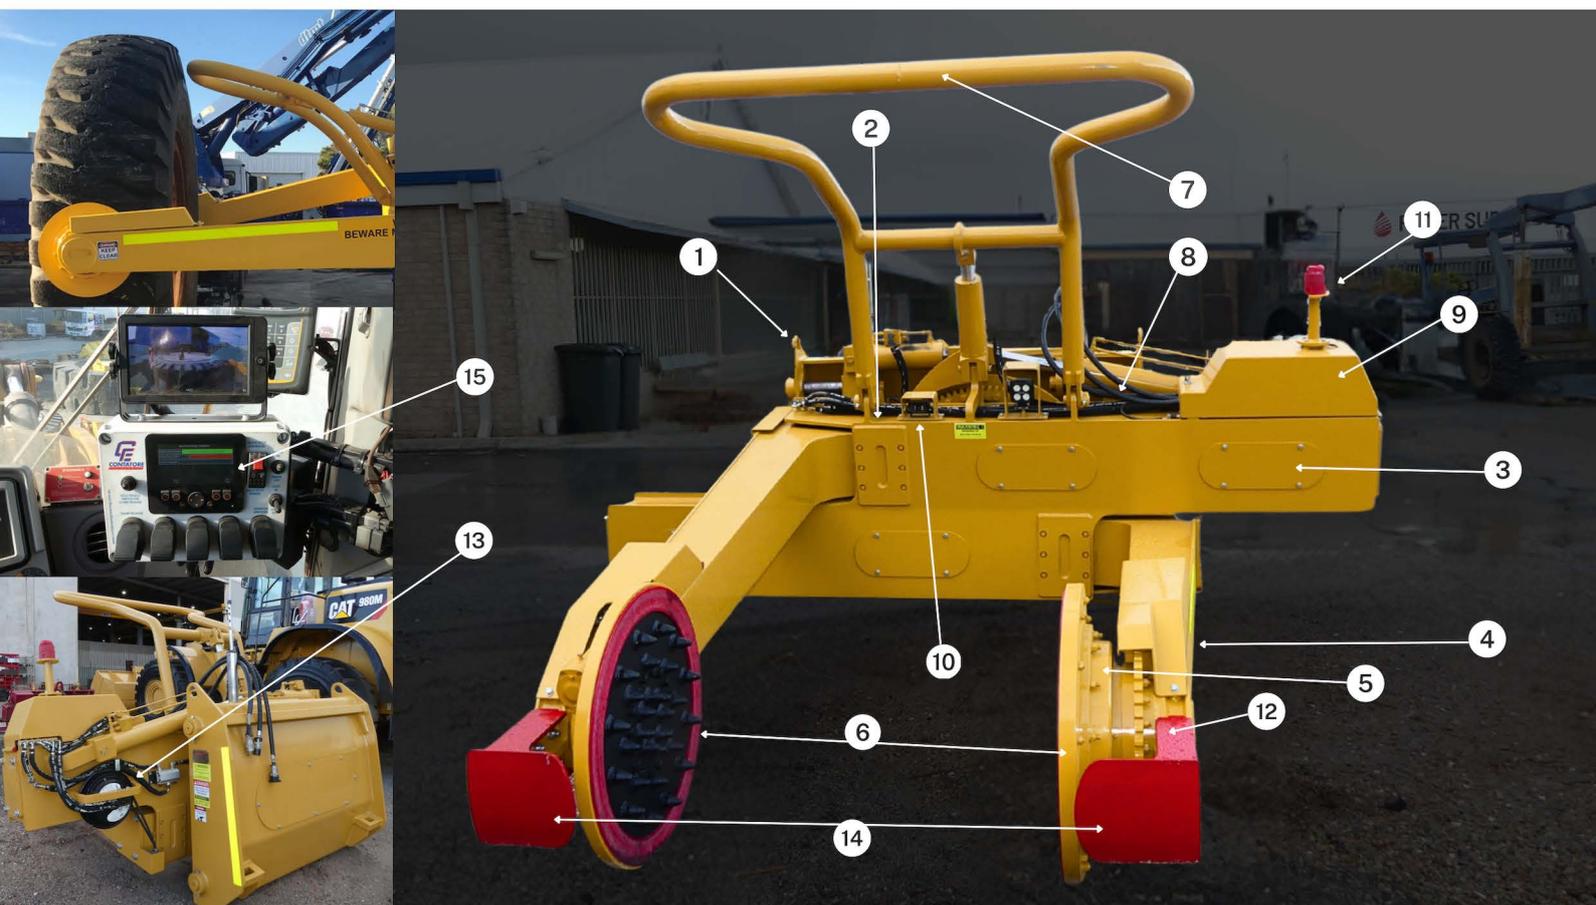

11) **Audio/Visual Warning**

12) **Automatic Grip Pad Rotation Lock**

13) **Auto-Retracting Hose Reel**

14) **Pad Protectors/Bead Breakers**

15) **LED Interface Display**

Contatore Engineering's Series 3, 4 Tonne Tyre Handler is the safest and most reliable on the market. With a **LED interface display** and **electric proportional joystick controls**, it is unmatched for operational speed and handling capabilities.

The pads allow **full 360 degree rotation in both clockwise and counter clockwise direction**. The Series 3 has **updated clamping span** and is installed with the newly developed **automatic grip pad rotation lock**.

The new lightweight design is constructed with fewer articulating components, with easily replaceable spare parts, thus **reducing potential component wear and minimising maintenance and downtime costs**, while also reducing **safety hazards**.

We provide our customers with a full service program as well as a comprehensive parts listing to ensure **simplified maintenance management**.
