

Tyre Handler Series 2 - 10 Tonne

Delivering
Engineering
Excellence

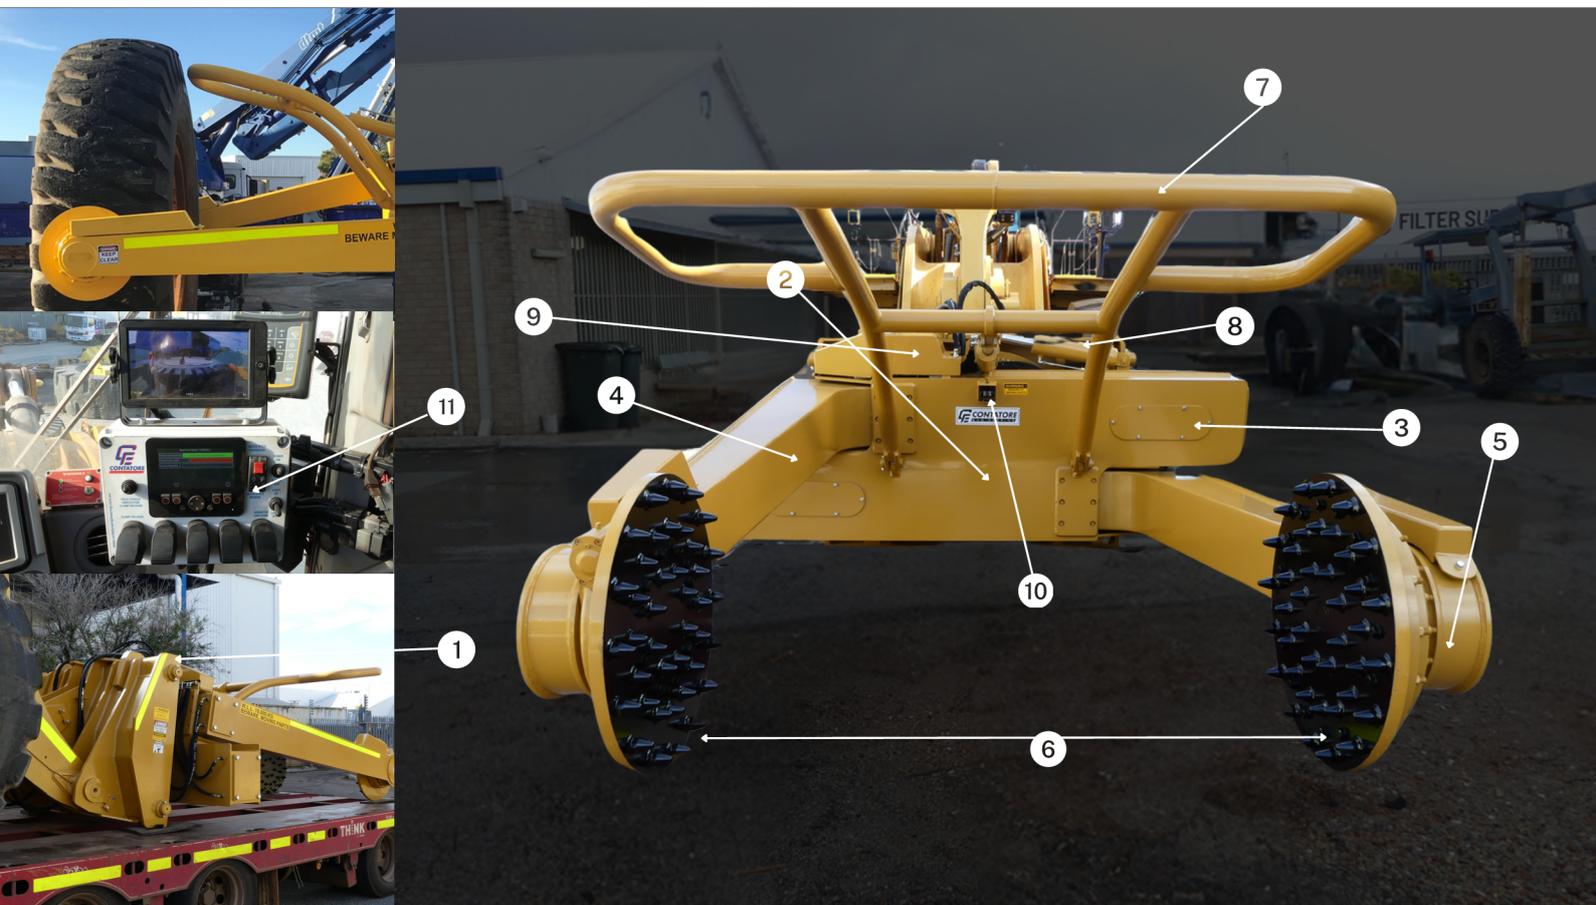

Quality
ISO 9001

Features

- 1) **Mounting Bracket** design to suit various machines and quick hitches
- 2) **The Series-2 Main Body** can rotate 15° clockwise and counter-clockwise
- 3) **Inspection Protection Covers** allowing easy access for maintenance
- 4) **Clamping Arms** have a maximum extension of 4500mm and a minimum retraction of 1600mm
- 5) **Over Pressure Sensor** with visual and audible alarm, in case of tyre being inflated in between the arms
- 6) **Clamp Pads**

- 7) **Hydraulically Driven Tyre Arrestor Arm** in the event of accidental tyre slip
- 8) **Side Shift** allowing 200mm lateral movement whilst in clamp mode for easy manipulation of tyre
- 9) **Hydraulic Circuits** incorporate load holding valves and pressure sensors for overload warnings
- 10) **Camera** for efficient and safe operation
- 11) **LED Interface Display**

Contatore Engineering's Series 2, 10 Tonne Tyre Handler is the safest and most reliable on the market. With a **LED interface display and electric proportional joystick controls**, it is unmatched for operational speed and handling capabilities.

The pads allow **full 360 degree rotation in both clockwise and counter clockwise direction**, and the main body can rotate 15 degrees either side (total 30 degrees).

The lightweight design is constructed with fewer articulating components, with easily replaceable spare parts, thus **reducing potential component wear and minimising maintenance and downtime costs**, while also reducing **safety hazards**.

We provide our customers with a full service program as well as a comprehensive parts listing to ensure **simplified maintenance management**.
